

Invitation for EPC Agencies for Small-Scale Solar Power Projects

Energy Infratech Private Limited is pleased to invite proposal from experienced EPC (Engineering, Procurement, and Construction) agencies for the development of small-scale solar power projects with capacities ranging from **5 MW to 20 MW**. We are seeking proposals for the following project categories:

Project Categories

1. Projects under State DISCOM Schemes

- Projects with established Power Purchase Agreements (PPA) under initiatives of State Electricity Distribution Companies (DISCOMs).

2. Joint Venture Captive Power Projects

- Solar projects developed in partnership with industries under the Joint Venture Captive Power framework.

Eligibility Criteria

EPC agencies must meet the following requirements to qualify:

- Demonstrated expertise in the complete execution of solar EPC projects, including land leasing, procurement, construction, commissioning, and optional Operation & Maintenance (O&M) services.
- Proven track record of successful implementation of solar power projects with similar capacities.
- Submission of detailed credentials and evidence of relevant project experience.

Proposal Submission Requirements

Interested agencies are requested to submit an indicative proposal containing the following documents:

- **Company Profile:** Highlighting experience and expertise in solar EPC projects.
- **Project Portfolio:** A list of successfully completed projects, including capacities, commissioning timelines, and key achievements.
- **Execution Strategy:** Proposed project execution strategy and indicative timelines.
- **Technical Proposal:** A detailed outline of the proposed approach, including technical specifications and design considerations.
- **Commercial Proposal:** A tentative indicative price proposal for 10MW Solar Power Project.

Submission Deadline

The Proposal must be submitted via email to business@energyinfratech.com by **16th February 2025**.

We look forward to receiving your proposals and exploring potential partnerships to advance the development of small-scale solar power projects.
